PHX EXCHANGE Investor Pitch Deck — The Digital Liquidity Layer for Saudi Hospitality

PREPARED FOR: Strategic Partners & Investors | **SUBMITTED BY:** Amina Yussuf Mohamed, Founder & Lead Architect | **DATE:** March 2026 | Remarkable Light

SLIDE 1 · TITLE & VISION

PHX EXCHANGE — The Digital Liquidity Layer for Saudi Hospitality

"Where Hotels Auction Broken Trade Agents Book."

SLIDE 2 · THE PROBLEM: THE "WHATSAPP CHAOS"

The Problem — The "WhatsApp Chaos"

Every year, millions of hotel room nights in Makkah and Madinah are traded through fragmented, manual networks. The result: is a broken supply chain.

Pain Point	Impact
Opaque Pricing	Wholesale inventory is negotiated via WhatsApp groups and phone calls with zero price transparency
Trust Deficit	No secure escrow mechanism for massive B2B room-block payments — disputes are resolved by reputation alone
Inventory Deadlock	Large blocks of unsold with major hotels while thousands of small travel agents lack access to quality inventory
Compliance Gap	Manual VAT invoicing, no audit trail, and zero integration with ZATCA or Ministry of Hajj systems

> "An estimated 30–35% of seasonal room inventory in Makkah and Madinah is traded with zero digital oversight — no escrow, no audit trail, no recourse."

SLIDE 3 · THE SOLUTION: THE "LIVE PIT"

The Solution — The "Live Pit"

PHX EXCHANGE is a real-time B2B/B2C marketplace that connects the three pillars of the Hajj & Umrah accommodation supply chain:

For Hotels "Mosques On Demand"
- Auction room blocks to a verified broker network
- Real-time competitive bidding ensures fair market value
- Escrow protection ensures fair auction dynamics
- Ministry BRN assignment for full regulatory compliance

For Brokers "Trade with Speed"
- Access a transparent secondary market for room inventory
- Win auctions, apply markup pricing, and distribute to agent networks
- Private and direct offer channels for established agents
- 7-day inventory discipline — use it or lose it

For Agents "Book with Confidence"
- Browse a verified marketplace of available rooms
- Atomic booking with instant escrow protection
- Register pilgrims, generate PDF vouchers with QR codes
- ZATCA-compliant tax invoices downloadable on demand

SLIDE 4 · MARKET OPPORTUNITY: VISION 2030

Market Opportunity — Vision 2030

Saudi Arabia's Vision 2030 is transforming the Kingdom into a global tourism powerhouse. PHX EXCHANGE is positioned at the center of this transformation.

150M — Vision 2030 Target — Annual tourists

2.5M — Current Hajj Pilgrims — Annually (growing)

275M — Umrah Visitors — Annually

$2.5B — Saudi Hajj/Bach Market — Projected by 2028

$12B — Hospitality Wholesale TAM — Estimated SAR-10B annually in Makkah/Madinah alone

The Gap

Most Saudi PropTech startups focus on residential real estate. PHX EXCHANGE is the first institutional-grade Hospitality Exchange purpose-built for the Hajj & Umrah supply chain.

The Timing

The Saudi government is actively digitizing the Hajj ecosystem (Nusuk platform, e-visa, smart city infrastructure). PHX EXCHANGE aligns perfectly with this national priority.

SLIDE 5 · THE "GENESIS PRO-RATA" PARTITIONING ENGINE

The 60/20 Escrow Split

Agent Books Rooms (SAR 12,000)

- 20% Instant — 80% Held in Escrow (SAR 2,400) — Broker Instant Hold Check in Commission — Hotel Check on Verified Payment
- Broker Wallet: 10% Instant — 10% Platform Fee (SAR 1,200) (SAR 400)

Feature	Description
Escrow Ledger	Audit-ready tracking of every hotel room-night across all user wallets
ZATCA Phase 2 Compliance	Full cleared UBL 2.1 invoices on PDF tax invoices with Saudi Arabian Tax-grade QR profiles
Escrow Dispute Resolution	Agent-initiated dispute freeze escrow. Admin resolves with full audit trail
Safety Logic	7-day inventory clawback, zero-bid expiry, verification gates, license-expiry suspension
Multi-Currency Display	SAR as primary with display conversion to USD, EUR, GBP, EGP, QR, PKR

SLIDE 6 · THE "GENESIS PRO-RATA" PARTITIONING ENGINE

Commission Engine — Fintech Engine

PHX EXCHANGE is not just a marketplace — it is a **financial operating system** for hospitality trading.

The Commission Split

Stream	Description
Premium Analytics Seek Tiers	Hotel dashboards tracking winning bid trends, demand forecasting, yield optimization
Tiered Broker Subscription	More inventory slots, priority access, advanced offer tools
Payment Processing	Gateway integration margin on net fund movement (Saudi SAMA sandbox)
Data Licensing	Anonymized market intelligence for hotel groups and tourism authorities

Future Revenue Streams

Timeline	Milestone
Q1 2027	Hotel dashboards live
Q2 2027	Gateway integration
Q3 2027	Tiered Broker Subscription
Q4 2027	Data Licensing

SLIDE 7 · BUSINESS MODEL: THE REVENUE

Business Model — The Revenue

PHX EXCHANGE generates revenue through a high-volume, low-overhead transaction fee model.

Primary Revenue: Platform Fee

- 5% on every successful settlement (the B2B hotel payout)
- Collected automatically at check-in or 48-hour auto-release
- Example: On a SAR 10,000 booking, PHX EXCHANGE collects SAR 500

Unit Economics

SAR...	SAR 2K	~0	85%
Average Booking Value — SAR 5,000–50,000 (SAR8)	Platform Fee per Booking — SAR 200–2,000	Marginal Cost per Transaction — Near zero (digital infrastructure)	Gross Margin Target — Target gross margin

SLIDE 8 · REGULATORY COMPLIANCE: THE "SAMA" SLIDE

Regulatory Compliance — The "SAMA" Slide

PHX EXCHANGE is built from the ground up for Saudi regulatory compliance.

Current Status: Virtual Letter MOF (Completed)

- Full financial logic implemented as an internal ledger
- No real money movement — all transactions are tracked digitally
- ZATCA-compliant tax invoice generation with TLV QR codes
- Ministry BRN integration for room-block assignments

Regulatory Roadmap — From Virtual Ledger to Real Money

The platform is architected so that each future integration plugs into an existing system — he rebuilds required.

Milestone	Timeline	Description	What We Have Today
Saudi Payment Gateway Sandbox	Q3 2026	Entry into SAMA's fintech sandbox to validate and exercise processing with SAR transfers	Virtual ledger with full Bo/20 escrow logic, payout requests, admin approval — ready to connect a payment gateway
Nafath Integration	Q4 2026	National SSO for biometric business identity verification	Admin-managed verification queue with document review, license-expiry auto-suspension
Nusuk Mosque API	Q1 2027	Direct API link to Ministry of Hajj for real-time BRN code validation	Hotels assign BRN codes to auctions; agents generate BRN-tagged PDF vouchers — API link automates validation
MISA Licensing	Q1 2027	Ministry of Investment licensing for B2B marketplace operations	Platform operating on technology demo
Full SAMA License	Q4 2027	Graduate from sandbox to full payment processing license	Sandbox track record provides evidence for full license application

SLIDE 9 · COMPETITIVE LANDSCAPE

Competitive Landscape

Feature	WhatsApp / Phone	Legacy OTAs	PHX EXCHANGE
Real-time Auctions	No	No	Yes
Escrow Protection	No	Partial	Automated Bo/20 split
ZATCA Tax Invoices	No	Partial	Full PDF with TLV QR
Ministry BRN Integration	No	No	Built-in
Secondary Market	Informal	No	Marketplace
Verification & Compliance	None	Basic	Multi-document with Admin review
Dispute Resolution	Reputation based	Manual	Automated with escrow freeze
Audit Trail	None	Limited	Complete wallet ledger
Multi-language	No	Partial	Full RTL support (AR/UR/FR/EN)

SLIDE 10 · TRACTION & TECHNICAL READINESS

Traction & Technical Roadmap

What We Have Built — Platform Core (Complete)

The platform logic has been engineered, tested, and is fully operational.

Component	Status	Detail
Auction Engine	Built	Real-time bidding with anti-sniping, WebSocket updates
Escrow System	Built	Bo/20 split, freeze/unfreeze, auto-release, dispute resolution
Wallet Ledger	Built	8 transaction types, payout requests, admin approval
Tax Invoicing	Built	ZATCA TLV QR codes, PDF generation, seller/buyer profiles
Verification	Built	Multi-document compliance: admin-review queue, license expiry
Safety Logic	Built	Zero-bid expiry, 7-day clawback, verification gates
Internationalization	Built	English, Arabic, Urdu, Farsi — full RTL support
Role Platform	Built	Admin, Hotel, Broker, Agent with role-specific dashboards

What Comes Next — With Funding

1 — Phase 1 — Platform Core Complete: Marketplace logic, escrow, compliance, and safety systems. **Key Deliverable:** Virtual ledger with full audit trail

2 — Phase 2 — Regulatory Sandbox (Q3-Q4 2026): SAMA sandbox entry, Nafath integration, payment gateway. **Key Deliverable:** Real bank fund movement through escrow

3 — Phase 3 — Live Market (2027): Full payment processing, Nusuk Mosque API, premium analytics. **Key Deliverable:** First live auctions with real hotel inventory

SLIDE 11 · THE TEAM

The Team

Amina Yussuf Mohamed — Founder & Lead Architect

Senior Software Engineer and Architect specializing in high-concurrency enterprise systems. Designed the escrow and settlement logic independently with the rigorous mindset required to meet the National Cybersecurity Authority (NCA) standards. Designed PHX EXCHANGE from the ground up as a Zero Trust security model.

Key Capabilities

- Deep understanding of the Hajj/Umrah accommodation supply chain
- Fintech and payment systems expertise
- Saudi regulatory and compliance knowledge
- Technical execution (full platform built and functional)

SLIDE 12 · THE ASK & USE OF FUNDS

The Ask & Use of Funds — Series Seed

Seed Allocation

Engineering — 40%	Operations — 30%	Marketing — 30%
SAMA payment gateway integration, Nafath biometric SSO, Nusuk Mosque BRN API, mobile apps, load testing required to meet the National Cybersecurity Authority (NCA) standards, Designed PHX EXCHANGE from the ground up as a Zero Trust security model.	SAMA sandbox application, MISA licensing, AML/KYC alignment, legal counsel, regulatory compliance liaison	Onboarding top 50 Saudi hotel groups, broker acquisition in Makkah/Madinah, agent network growth across GCC and Saudi Arabia

What Funding Unlocks

The platform is code built, investment capital unlocks three critical integrations that move PHX EXCHANGE from demo to live marketplace:

Integration	Impact
SAMA Payment Gateway	Enables real SAR fund movement through the existing escrow engine
Nafath Biometric SSO	Replaces manual verification with government-backed identity checks
Nusuk Mosque BRN API	Automates Ministry of Hajj room allocation validation in real time

Key Milestones with This Funding

Milestone	Timeline	Success Metric
SAMA Sandbox Approval	Q3 2026	Regulatory green light for real income transactions
Nafath SSO Live	Q4 2026	Automated identity verification replacing manual document review
First 10 Hotel Partners	Q1 2027	Live auctions with real inventory and real SAR payments
Nusuk Mosque API Connected	Q1 2027	Real-time BRN validation on every auction listing
First 100 Broker Accounts	Q1 2027	Active bidding and secondary market trading
Series A Readiness	Q2 2027	Revenue generation and unit economics validation
Series A Raised	Q4 2027	Proven product-market fit with audited financials
