PHX EXCHANGE

The Digital Liquidity Layer for Saudi Hospitality

Digitizing the $100B wholesale room-block market for Hajj & Umrah.

> *"Where Hotels Auction. Brokers Trade. Agents Book."*

Prepared for Strategic Partners & Investors

Submitted by Amina Yussuf Mohamed, Founder & Lead Architect

March 2026
Ramadan 1447H

THE PROBLEM

The "WhatsApp Chaos"

Every year, millions of hotel room-nights in Makkah and Madinah are traded through fragmented, manual channels. The result is a broken supply chain.

Opaque Pricing
Wholesale inventory is negotiated via WhatsApp groups and phone calls with zero price transparency.

Trust Deficit
No secure escrow mechanism for massive B2B room-block payments — disputes are resolved by reputation alone.

Inventory Deadlock
Large blocks sit unsold with major brokers while thousands of small travel agents lack access to quality inventory.

Compliance Gap
Manual VAT invoicing, no audit trail, and zero integration with ZATCA or Ministry of Hajj systems.

> *"An estimated 60-70% of seasonal room inventory in Makkah and Madinah is traded with zero digital oversight — no escrow, no audit trail, no recourse."*

THE SOLUTION

The "Live Pit"

PHX EXCHANGE is a real-time B2B2C marketplace connecting every stakeholder in the Hajj & Umrah accommodation supply chain.

For Hotels

"Maximize Your Yield"

- Auction room blocks to a verified broker network
- Real-time bidding drives true market pricing
- Anti-sniping protection ensures fair outcomes
- Ministry BRN assignment for compliance

For Brokers

"Trade with Speed"

- Transparent secondary market for room inventory
- Win auctions, set markup, distribute to agents
- Private and direct offer channels
- 7-day inventory discipline — use it or lose it

For Agents

"Book with Certainty"

- Browse verified marketplace with hotel images
- Atomic booking with instant escrow protection
- Branded public storefront for pilgrim bookings
- ZATCA-compliant tax invoices on demand

For Pilgrims

"Trust and Transparency"

- Book through agent storefront — no middlemen
- Track visa status with 3-step progress tracker
- Download PDF voucher once visa is issued
- Escrow guarantees accommodation is funded

MINISTRY ADVANTAGES

The Headaches PHX Eliminates

Every pain point the Ministry of Hajj faces today in regulating accommodation trading — resolved by a single platform.

TODAY'S HEADACHES

No Visibility Into Market Pricing
Room blocks trade via WhatsApp at unknown prices. The Ministry cannot detect price gouging or market manipulation.

Pilgrim Money Is Unprotected
Billions of riyals change hands with no escrow. When disputes arise, there is no mechanism for recovery or accountability.

Unverified Operators
Hotels, brokers, and agents operate without centralized verification. Bad actors re-enter the market each season.

Zero Audit Trail
No digital record of who sold what, to whom, at what price. ZATCA compliance is impossible to enforce at scale.

Pilgrim Data Is Fragmented
Pilgrim accommodation assignments exist in spreadsheets and emails. No real-time sync with Nusuk or Ministry systems.

WITH PHX EXCHANGE

Complete Price Transparency
Every auction, bid, and sale price is recorded. The Ministry sees true market value for the first time.

Escrow-Protected Payments
80% held until hotel check-in is confirmed. Pilgrim funds are guaranteed. Disputes freeze money automatically.

Verified Operator Registry
Every participant is verified before trading. Licenses are tracked. Bad actors are suspended instantly.

Full Financial Audit Trail
Double-entry ledger records every riyal. ZATCA-compliant invoices generated automatically with TLV QR codes.

Real-Time Pilgrim Pipeline
Pilgrim data flows from booking to Nusuk Masar sync to visa issuance — digitized, traceable, and Ministry-ready.

MARKET OPPORTUNITY

Vision 2030 Alignment

150M	2.5M	27.5M	$12B
ANNUAL TOURISTS	HAJJ PILGRIMS	UMRAH VISITORS	WHOLESALE TAM
Vision 2030 Target	Annually (growing)	Annually	Makkah/Madinah hospitality

The Gap

Most Saudi PropTech startups focus on residential real estate. PHX EXCHANGE is the first institutional-grade Hospitality Exchange purpose-built for the Hajj & Umrah supply chain.

The Timing

The Saudi government is actively digitizing the Hajj ecosystem (Nusuk platform, e-visa, smart city infrastructure). PHX EXCHANGE aligns perfectly with this national priority.

Saudi PropTech market projected at $2.5B by 2028

FINTECH ENGINE

The "Underlying Magic"

PHX EXCHANGE is not just a marketplace — it is a financial operating system for hospitality trading.

THE 80/20 ESCROW SPLIT

Agent Books Rooms
SAR 10,000

20% Instant
SAR 2,000
Broker Commission

80% Held in Escrow
SAR 8,000
Until Hotel Check-in

95% to Hotel
SAR 7,600

5% Platform Fee
SAR 400

CORE FINANCIAL INFRASTRUCTURE

Double-Entry Wallet Ledger
Audit-ready tracking of every Halala across all user wallets

ZATCA Phase 2 Compliance
TLV-encoded QR codes on PDF tax invoices with seller/buyer VAT profiles

Escrow Dispute Resolution
Agent-initiated disputes freeze escrow; Admin resolves with full audit trail

Multi-Currency Display
SAR primary with real-time conversion to USD, IDR, PKR

BUSINESS MODEL

The Revenue

PRIMARY REVENUE: PLATFORM FEE

- 5% fee on every escrow settlement (the 80% hotel payout)
- Collected automatically at check-in or 48-hour auto-release
- Example: On SAR 10,000 booking, PHX EXCHANGE collects SAR 400

REGULATORY COMPLIANCE

The "SAMA" Slide

Built from the ground up for Saudi regulatory compliance. Each future integration plugs into existing systems — no rebuilds required.

CURRENT STATUS: VIRTUAL LEDGER MVP (COMPLETE)

- ✓ Full financial logic as internal ledger
- ✓ ZATCA-compliant tax invoices with TLV QR
- ✓ Ministry BRN integration for room blocks
- ✓ No real money movement — all tracked digitally

REGULATORY ROADMAP

MILESTONE	TIMELINE	DESCRIPTION	WHAT WE HAVE TODAY
SAMA Sandbox	Q3 2026	Fintech sandbox for real escrow	Full 80/20 logic ready
Nafath SSO	Q4 2026	Biometric business identity	Admin verification queue live
Nusuk Masar API	Q1 2027	Ministry BRN validation	BRN assignment built
MISA License	Q1 2027	B2B marketplace license	Platform as tech demo
Full SAMA License	Q4 2027	Full payment processing	Sandbox track record

COMPETITIVE LANDSCAPE

Why PHX Wins

FEATURE	WHATSAPP / PHONE	LEGACY OTAS	PHX EXCHANGE
Real-time Auctions	No	No	Yes
Escrow Protection	No	Partial	80/20 Auto
ZATCA Tax Invoices	No	Partial	Full TLV QR
Ministry BRN	No	No	Built-in
Dispute Resolution	Reputation	Manual	Auto + Freeze
Pilgrim Visa Tracking	No	No	3-Step Live
Agent Storefront (B2C)	No	No	Built-in

OUR MOAT

1

Saudi-Specific Integration

BRN, ZATCA, Nafath, Nusuk already architected

2

Purpose-Built for Hajj

Not a generic hotel platform adapted for pilgrimage

3

Financial Infrastructure + Network Effects

Escrow engine, double-entry ledger, multi-sided marketplace

What We've Built

PLATFORM CORE (COMPLETE)

COMPONENT	STATUS	DETAIL
Auction Engine	BUILT	Real-time bidding, anti-sniping, WebSocket
Escrow System	BUILT	80/20 split, freeze, auto-release, disputes
Wallet Ledger	BUILT	6 transaction types, payouts, admin approval
Tax Invoicing	BUILT	ZATCA TLV QR, PDF generation
Verification	BUILT	Multi-doc compliance, admin review
4-Role Platform	BUILT	Admin, Hotel, Broker, Agent dashboards
i18n + RTL	BUILT	English, Arabic, Urdu, Farsi
Agent Storefront	BUILT	B2C booking portal, CSV upload, group booking
Pilgrim Pipeline	BUILT	Nusuk sync, visa tracking, PDF vouchers

WHAT COMES NEXT — WITH FUNDING

PHASE 1

Platform Core — Complete

Marketplace logic, escrow, compliance, safety systems. Virtual ledger with full audit trail.

PHASE 2

Regulatory Sandbox — Q3-Q4 2026

SAMA sandbox entry, Nafath biometric identity, payment gateway. Real SAR fund movement through escrow.

PHASE 3

Live Market — 2027

Full payment processing, Nusuk Masar API, premium analytics. First live auctions with real hotel inventory.

THE FOUNDER

Solo Founder. Full Platform. Zero Dependencies.

Amina Yussuf Mohamed

Founder & Lead Architect

Senior Software Engineer and Architect specializing in high-concurrency enterprise systems. Background in Telecommunications and Cybersecurity, with the technical pedigree required to meet National Cybersecurity Authority (NCA) standards.

Single-handedly designed, engineered, and deployed the entire PHX EXCHANGE platform — auction engine, escrow system, compliance pipeline, four role-based dashboards, and all 162 verified requirements. Zero outsourced code. Zero technical debt.

> *Seed funding will scale the team with domain-specific hires across engineering, operations, and business development.*

WHAT ONE FOUNDER BUILT

Full-Stack Platform
4 role-based dashboards, real-time auctions, escrow, marketplace

Financial Operating System
Double-entry ledger, 80/20 escrow, dispute resolution, ZATCA invoicing

Regulatory Compliance Layer
SAMA, ZATCA, NCA, NDMO frameworks — ready for sandbox entry

Pilgrim-to-Ministry Pipeline
Storefront bookings, Nusuk sync, visa tracking, PDF vouchers
